RPA DEVELOPER

As a skilled RPA developer with four years of experience, I specialize in transforming business processes through the implementation of RPA solutions using UiPath, Blue Prism and Power Automate. My expertise lies in analyzing complex business processes, designing and developing scalable RPA solutions, and optimizing workflows to achieve tangible business outcomes. I am driven by the desire to streamline operations, enhance productivity, and drive positive change within organizations.

SKILLS

UiPath	Power Platform	Git(Gitlab/Github/Bitbucket)	Javascript
Blue Prism	AWS	APIs	Python/Powershell
Power Automate	CI/CD	Databases (SQL/NoSQL)	VB

PROFESSIONAL EXPERIENCE

Manibus AI   **Sept 2024 - Present**
Power Platform Consultant

- Development and implementation of cloud flows and desktop flows using Power Automate for process automation and efficiency improvement.
- Creation of custom applications with Power Apps, integrated with SharePoint, Teams, Dataverse, and external APIs.
- Design and maintenance of interactive dashboards and reports in Power BI for data-driven decision-making.
- Administration and configuration of Power Platform environments, including development, testing, and production setups.
- Implementation of CI/CD pipelines using Azure DevOps to support Application Lifecycle Management (ALM) processes.

Excelia   **Feb 2023 - Aug 2024**
Senior RPA Consultant

- Refactoring RPA platform: methodology, best practices, use cases, processes optimization
- UiPath migration to Cloud through UiPath Orchestrator and AWS: provisioning EC2 (VM), deploying and setting up the client infrastructure
- Migration from UiPath to Power Automate (Cloud & Desktop - included AI capabilities and setting up the client infrastructure)
- RPA complete lifecycle using UiPath and Power Automate: analysis, development, testing, deploying (including CI/CD pipelines) and maintenance
- UiPath administration and infrastructure management: expertise in managing Orchestrator, configuring tenants, user roles, and permissions.
- Scripting in Python, Powershell, Javascript, VB

Arval Leasing (BNP Group)   **May 2022 - Feb 2023**
RPA Automation Engineer

- Developed and implemented enhancements to existing RPA processes, streamlining operations and improving workflow efficiency.
- Analyzed business processes and identified automation opportunities to enhance productivity and reduce costs.
- Designed and developed robust RPA solutions using UiPath and Blue Prism, ensuring scalability and maintainability.
- Provided comprehensive maintenance and support for RPA platforms (Blue Prism and UiPath), ensuring optimal performance, reliability, and adherence to best practices.
- Migration from UiPath to BluePrism

Ernst & Young   **March 2020 - May 2022**
RPA Consultant

- Analyzed and evaluated business processes to identify automation opportunities and develop data-driven RPA solutions.
- Developed and implemented automated RPA solutions using Blue Prism and UiPath to streamline data-driven workflows and improve operational efficiency.
- Leveraged C#, VB, PowerShell, and Python to develop custom RPA scripts and integrate with existing data systems and applications.
- Utilized the ELK stack (Elasticsearch-Logstash-Kibana) and web services to perform data analysis and visualization, generating insights to support informed decision-making.
- Administered and managed SQL and NoSQL databases to ensure the integrity and accessibility of data for RPA processes.

EDUCATION

Carlos III University of Madrid, 2015-2020
Bachelor of Telecommunication Engineering (Bilingual degree: spanish-english)

Salesianos Atocha School, 2013-2015
Telecommunication and IT System Technician
